Interactive Housing Assessment for People with Disability

Overview: This Housing Assessment is designed to guide people with disability, their families and carers through the decisions involved in determining and evaluating housing options. Using our purpose designed modelling tools and our experience in planning and development, we will work through an interactive process to identify individual requirements, prepare a group housing brief, assess alternatives and facilitate an outcome.

Suitable for: Family and other groups, Disability Organisations and Housing Providers

Process: We will work with you through a process that includes:

- Customisation of our tool for use with your group or organisation
- Interactive workshop(s) with individuals with disability, their families and carers
- Identification of Housing Providers suitable as potential partners and inclusion in workshop if desired
- Identification of a Housing Brief for each individual and household
- Preparation of a group Project Brief
- Identification of preferred housing options to fulfil Housing/Project Brief

Deliverables: Comparative cost/benefit analysis of preferred housing options

Cost: Negotiable depending on the nature of the group and the scope of the process

Ongoing use: Once all requirements and other information are captured, the interactive modelling tool can be used throughout the development of a project to guide the exploration and refinement of housing options and the ongoing evaluation of costs and feasibility.
